EDUCATION & CERTIFICATIONS

Bachelor of Science in Interactive Design **August 2019 - May 2024**
Minor in Technical Communication, GPA: 3.73

CompTIA A+ Certification **August 2026**
Computing Technology Industry Association

EXPERIENCE

Operations Manager / Inventory Specialist / IT Support, Dancing Goats **December 2024 - Present**

- Oversee data collection and update performance metrics tied to productivity goals
- Manage stock levels to balance ROI against quality assurance of agricultural products
- Coordinate staff across five points of contact in the store to drive proactive engagement and guest satisfaction
- Train and lead a team of 7 in a fast-paced, time-sensitive environment
- Maintain data synchronization across POS, mobile devices, and the back-office computer
- Diagnose connectivity outages, isolate whether the cause is on-site or upstream, and escalate to the ISP with diagnosis

Junior UX Designer, MountainSeed **May 2024 - October 2024**

- Developed data and functional requirements, use case scenarios, flowcharts, and user journey maps
- Produced multiple sets of data visualizations tailored to different analysis perspectives and visualization tools
- Led design critiques with data operations, development, sales, and project management
- Delivered heuristic usability analysis reports and design critiques during production
- Streamlined production handoff with usage guidelines and specifications for interactions and visuals

PROJECTS

Atlas, Home Lab Infrastructure & Security Project (Personal / Collaborative) **July 2026 - Present**

- Built and administer a Proxmox VE home lab running isolated Kali Linux, Ubuntu, and Windows 11 VMs for system administration practice
- Configured VLAN segmentation and firewall rules; used Wireshark to verify segmentation and troubleshoot connectivity

Financial Transaction ETL Pipeline (Personal) **January 2026**

- Built an ETL pipeline in Python that extracts financial transaction data, then cleans, validates, and categorizes it before loading it into a database
- Wrote SQL queries using joins, subqueries, CTEs, and aggregation to produce financial reports from the loaded data

UX Designer, Kiwi - AR Airport Navigation (Collaborative Academic Project) **January 2023 - May 2023**

- Produced a hi-fi prototype for an AR airport navigation app designed for Apple Vision Pro, covering wayfinding, terminal maps, ticket information, and staff assistance requests
- Spearheaded prototyping the interactive, dynamic terminal map interface and owned the user journey for navigation assistance
- Applied Lean UX to deliver MVPs, prioritizing which hypotheses to form and test within a short timeframe
- Moderated usability test sessions and recruited participants; findings drove a second sprint of revisions

SKILLS

- **Analysis:** SQL (joins, subqueries, CTEs, aggregation), Python, ETL Pipelines, Data Analysis, Data Visualization, Data Modeling, Mixed-Methods Research, User-Journey Mapping
- **Software:** Microsoft Office (Excel, PowerPoint, Word), Tableau, DBeaver, Figma, FigJam, Visual Studio Code
- **Communication:** Technical Documentation, Training Curriculum Development, Status & Stakeholder Reporting
- **Technical:** Hardware Installation, Configuration & Troubleshooting; Networking Fundamentals (TCP/IP, SOHO Network Setup, Wireless Standards, Cabling, Network Troubleshooting); Virtualization & Cloud Computing Concepts
